Ody Shbayeh

A dedicated Computer Engineering graduate from **Birzeit University** (B.Sc., July 2025) with a strong foundation in core engineering principles. Having gained hands-on experience through internships and technical training, I am now pursuing entry-level opportunities to contribute to impactful projects, collaborate with multidisciplinary teams, and further develop my expertise in a professional setting.

EDUCATION

Bachelor of Computer Engineering, Birzeit University – *Graduated July 2025*

Backend Engineering Training Program, ASAL Technologies — *Completed Feb 2025*

DevOps Training Program, ASAL Technologies — *February 2025 – Present*

Relevant coursework: Operating Systems | Database Systems | Data Structures | Object-Oriented Programming | Embedded Systems | Software Engineering | Database Management

SKILLS

- **Programming Languages:** C, Java, Python.
 - **Hardware Description:** Verilog, VCS.
 - **Assembly languages:** MIPS, Intel Assembly.
 - **Database Management:** SQL, MongoDB.
 - **Operating Systems:** Linux, Windows.
 - **Tools & Technologies:** RESTful APIs, Git, Spring Boot, UVM.
-

MORE ABOUT ME

- Fluent in English with strong written and verbal communication skills.
 - Fast learner, adaptable to new technologies and development environments.
 - Highly organized, detail-oriented, and proficient in problem-solving.
 - Passionate about continuous learning, staying current with industry trends, and working in collaborative, creative, and innovative environments.
-

PROFESSIONAL EXPERIENCE

Backend Engineering Trainee, ASAL Technologies, Ramallah (September 2024 – February 2025)

- Developed and maintained RESTful APIs using Java and Spring Boot Core.
- Integrated MongoDB to handle database operations and implemented CRUD functionalities.
- Collaborated with cross-functional teams to design, develop, and maintain scalable backend solutions.

DevOps Trainee – ASAL Technologies, Ramallah (February 2025 – Present)

Currently training in DevOps at ASAL Technologies, with a focus on CI/CD, cloud deployment, and infrastructure automation.

ACADEMIC PROJECTS

Intelligent Traffic Management & Red-Light Violation System – Capstone Project Birzeit University, 2024 – 2025

- Processed 30-minute 4K drone videos at 30 FPS using YOLOv8 + SORT tracking to detect vehicles and traffic-light states in real time.
- Counted cars inside polygonal ROIs, calculated congestion metrics, and recommended adaptive green-light durations.
- Logged frame-level JSON summaries and evidence images to MongoDB; exposed data via FastAPI for a React dashboard.
- Achieved 86 % red-light-violation detection accuracy and simulated a 25 % queue-length reduction in rush-hour tests.

Trainee's Portal – *Back-end Developer* | Spring Boot , MySQL, Postman.

- Collaborated in a 2-person team to design and implement a Trainee Portal showcasing new methods for trainees to sign to Asal Training courses.
- Developed RESTful APIs with java/Spring Boot Core and MySQL for data storage, including search, filtering.
- Ensured code quality with form validation, context-based state management, and seamless user authentication and authorization.
